

Fertilizer Encapsulated Coir Bricks

It was developed for immature rubber plants to maximize fertilizer use efficiency and minimize wastage.

Benefits:

- ❖ **Only one application per year**
- ❖ **Reduce labour cost associated with fertilizer application by 75%**
- ❖ **Minimize fertilizer wastage and environmental pollution**
- ❖ **Maximize fertilizer use efficiency**
- ❖ **Valuable product from cheap industrial waste material**
- ❖ **No need to weed control in manuring circle because of no regular fertilizer application**
