

“Shaka Sara” Liquid Organic Fertilizer

It was developed by using freely available organic materials: green manure, farm yard manure, crop residues, locally available ERP and Dolomite.

Benefits:

- ❖ **Environmental friendly, economically viable organic fertilizer**
- ❖ **Most suitable for low growth immature rubber plants**
- ❖ **Enhance soil fertility and inorganic fertilizer use efficiency**
- ❖ **Under girding of immature *Hevea* can be overcome by the application of “Shaka Sara” with extra dose of inorganic fertilizers in an integrated manner**
