

Slow release fertilizers for rubber nursery plants

Application of slow release fertilizers for rubber nursery plants was observed more benefits compared to conventional fertilizer application.

Benefits:

- ❖ **Only one fertilizer application for the total nursery stage**
- ❖ **Totally cut down the labour cost associated with continuous fertilizer application throughout the nursery stage**
- ❖ **Minimize fertilizer wastage and environmental pollution**
- ❖ **Maximize fertilizer use efficiency**
- ❖ **Preparation of healthy planting material at the end of 6 months**
