

CONTENTS

Humic acid based liquid organic fertilizer improved the growth of nursery and immature rubber plants grown in <i>Boralu</i> soil series <i>R S Dharmakeerthi, J A S Chandrasiri and V U Edirimanne</i>	1
Organic carbon stocks in rubber (<i>Hevea brasiliensis</i>) growing soils of Sri Lanka and strategies to increase: A Review <i>R S Dharmakeerthi</i>	16
Identification of instability in natural rubber prices in Sri Lanka <i>H M L K Herath, S Samita and Wasana Wijesuriya</i>	37
Export performance of rubber products manufacturing sector in Sri Lanka <i>J K S Sankalpa, Wasana Wijesuriya and P W Jeewanthi</i>	51
Genetic polymorphism and expression of the rubber elongation factor gene (<i>ref</i>) in <i>Hevea brasiliensis</i> cultivars <i>D P S T G Attanayaka</i>	62
Use of rainfall patterns for effective management of rubber plantations in Eastern, North central and Northern provinces of Sri Lanka <i>Wasana Wijesuriya, D M A P Dissanayake, H M L K Herath, S B Karunaratne, P W Jeewanthi, B R Kulasekera and C S Gurusinghe</i>	72
Reinforcement and curing characteristics of organoclay filled natural rubber nanocomposites <i>G M C Alwis, U N Ratnayake and N Kottegoda</i>	89
A Bayesian Belief Network to evaluate issues in producing higher grades of sheet rubber by smallholder farmers in Kalutara district <i>J C Edirisinghe, L G D P Kumara, A P S Fernando, H M L K Herath, U K Jayasinghe-Mudalige, M S S Mendis and L D M Nimanthika</i>	104
